Welcome to RenderCV

RenderCV reads a CV written in a YAML file, and generates a PDF with professional typography.

Each section title is arbitrary.

You can choose any of the 9 entry types for each section.

Markdown syntax is supported everywhere. This is **bold**, *italic*, and [link](#).

Education

MS	Chung Yuan Christian University , Applied Mathematics	Sept 2020 – June 2022
BS	Chang Jung Christian University , Accounting and Information	Sept 2015 – June 2019

Experience

Fortune Fantasy Global Tech .Ltd , Backend Engineer	On-site
- Develop various modern slot games - Administrator backend management - Explore OpenClaw usage with business	June 2025 – present 11 months
Fontech , Senior Backend Engineer	Remote
A real-time, high-throughput, multi-tenant SaaS alarm management service used by various U.S. corporations.	Nov 2024 – May 2025 7 months
- Built from the ground up - Spearheaded a team of 3 backend engineers, implementing robust library with clean architecture to improve team's 50% delivery velocity - Architected critical system components focusing on horizontal scalability - Integrated various AWS infrastructure (Cognito, EC2, KMS, RDS...etc) to reduce operational overhead - Developed advanced SQL query optimizations that reduced complex query times from 60s to 0.1s	
AMI , BMC Firmware Engineer II	Oct 2024 – Mar 2025 6 months
- Independently operates in BMC - Proficient in D-Bus usage - Experienced and skilled in developing with Redfish APIs - Implemented optimization library for REP architecture, saving up to 50% time and code to do parse and validate - Resolved multiple defects across different level modules - Proactively proposes solutions to work-related issues and shares them with teams - Collaborate with India and US teams with English communication	
Taihe Technology Co., Ltd. , Backend Engineer	Hybrid
- Implemented new features and maintained existing microservice projects using PHP and Go - Developed new payment and management system using GoFrame and gRPC - Quickly familiarized with customized ORM, project architecture, and memSQL - Assisted juniors in resolving backend and frontend issues	Mar 2024 – Sept 2024 7 months

CleNET Technologies, Software Engineer

- Responsible for testing Pixel cameras, also developing scripts (Python, Shell) to increase automation test coverage from 85% to 95%
- Analyzed test data for potential root causes
- Maintaining the automated testing pipeline

On-site at Google's Camera
System Team
Sept 2023 – Mar 2024
7 months

Ubitus, Backend Engineer

- Development of programs based on microservices and cloud infrastructure (Kubernetes, AWS) using Go, Python, and Node.js.
- Deployment and scripting for setting up cloud services and various services using Docker, Ansible, and Helm.
- Development and maintenance of an existing in-game content management system using Node.js, Go, and Python.
- Establishing a real-time Twitter comment monitoring system for internal use using Python and Prometheus.
- Developing AI-related services and applications like stable-diffusion using Python.
- Built up log collectors and workflow mechanisms using Fluentd and Airflow.
- Writing unit tests, integration tests, and end-to-end tests using K6.

Taiwan
June 2021 – Aug 2023
2 years 3 months

Chung Yuan Christian University, Teaching Assistant

- Object Oriented Programming TA
- Introduction to Data Science TA

Taiwan
Sept 2021 – June 2022
10 months

Projects

FlashInfer

Jan 2023 – present

Open-source library for high-performance LLM inference kernels

- Achieved 2.8x speedup over baseline attention implementations on A100 GPUs
- Adopted by 3 major AI labs, 8,500+ GitHub stars, 200+ contributors

Skills

Languages: Python, C++, CUDA, Rust, Julia

ML Frameworks: PyTorch, JAX, TensorFlow, Triton, ONNX

Infrastructure: Kubernetes, Ray, distributed training, AWS, GCP

Research Areas: Neural architecture search, model compression, efficient inference, multi-agent RL
